NEW Recip line-up: **Q&A**

What is the change?

The recip portfolio will move from a name-based convention to an application-based selection.

In the past, blades were organized by brand name, including Master Cobalt, Renovator, Havoc, Pipe Boss, Auto Salvage, and more. Blades will now be sorted into four categories and can be chosen based on the applications being cut.

Why has Morse simplified its line of recip blade products?

This change allows Morse to be easier to do business with! We take pride in providing you the most reliable performance, quality, and delivery in the industry and this helps take it up another notch.

This streamlined program will allow for quicker blade selection and less inventory while still cutting the same wide range of materials!

When does the change go into effect?

Morse prides itself in carrying inventory to make sure your product ships same day. Implementing the new lineup is a big undertaking and will therefore be a rolling change. As inventory is depleted, new blade brands and updated packaging will be shipped and hitting the shelves. This means there will be the possibility of mixed shipments in the short term.

Discontinued items will be sold on a first-come-first-serve basis.

Who does the change effect?

This change will impact all customers.

Will my part numbers change?

Select parts will have adjustments; overall, part numbers will remain unchanged. Changes by line are:

HD Line

- All part numbers will remain the same
- New bulk 100 packs in 6" (152mm), 8" (203mm), and 9" (229mm)

Pro Line

- Demolition (formerly Renovator and Havoc) and Auto Dismantling (formerly Fire&Rescue) part numbers will change as these parts will be moving from 3/20 packs to 5/25 packs
- All other parts will remain the same
- New bulk 100 packs in 6" (152mm) and 9" (229mm)

Pro Line CT

- All part numbers will remain the same

Specialty

- Carbide Grit 3-packs will be moving to 5-packs
- All other part numbers will remain the same

What resources will be available?

- Updated website page: <https://www.mkmmorse.com/products/reciprocating-saw-blades/>
- Excel Files:
 - Pricing
 - New Lineup Cross Reference
 - Discontinued Item Cross Reference
- Launch Deck

Will recip kits be changing?

- RBKITGP01 will remain the same
- RBKITHD01 and RBKITDM01 will have the 7/8" (22mm) .062 (22mm) 10T changed to 8/11T and the remainder of the kit will remain the same
- Any kits that were available in boxes (RBKIT01, RBKIT02, RBKIT03) and the assortment card (RBP01) will no longer be available.
